Please note:

Removal of Personal TV Aerials:

The remainder of the units will be connected to new digital TV reception equipment over the next 6 months. After a unit has been connected, owners are required to remove any personal TV aerials installed in (or attached to) common property. Owners are also reminded that if approvals have been granted for modifications in the past, any replacement or upgrades of modified items must be re-approved. Note that common property includes: external walls/windows/doors, the entire balcony area, walkways and the entire plumbing duct.

Electric Hot Water Systems:

Due to limitations in the electrical supply to the building electrical hot water systems are not permitted to be installed, if electrical systems have been approved by the strata company in the past, they may not be replaced and must be converted to gas. **Exclusive Strata Management
Insurance requirements and important information for Strata Plan 5629**

Your strata company is required to comply with various insurance provisions of the *Strata Titles Act, 1985 (WA)* (“Act”). Sections 53 to 59 of the Act set out the full insurance requirements. These requirements are insured under the current policy, details of which are shown on the attached Insurance Schedule issued by the insurer.

In the case of the sum insured in respect of buildings this must be for the replacement value as defined by the Act. We recommend that an independent valuation be carried out at a minimum of three yearly intervals to ensure that this cover is kept in line with current and projected building replacement costs.

In the case of public liability risks the minimum amount under the Act is \$5 million. Many strata companies now insure for a minimum of \$20 million in residential schemes and as much as \$50 million where there is any commercial use of lots or common property.

- A. We also suggest that every strata company effects insurance in respect to possible liability under the *Workers Compensation and Injury Management Act 1981* and your strata company has insured against such a risk.

The strata company has the discretionary power to further insure for other risks such as personal accident for voluntary workers, fidelity guarantee, office bearer’s liability, machinery breakdown, catastrophe cover government audit costs, and proprietors fixtures and improvements.

The enclosed insurance schedule will show which risks have been selected as currently insured and the sum insured where that is applicable.

General Advice Warning

The above information is not personal advice. This advice is general advice and before a decision is made to insure, the Product Disclosure Statement should be carefully reviewed. The strata company has been provided with a copy of the relevant CHU Financial Services Guide and Product Disclosure Statement and these are held as part of the records of the strata company and are open to personal inspection by proprietors pursuant to section 43 of the Act.

Exclusive Strata Management are authorised to give General Advice and information about insurance, but not Personal Advice. If the strata company requires specialist insurance advice we can refer it to an insurance advisor or CHU. If we recommend that your insurance be placed with CHU the strata company acknowledges and agrees that the recommendation is General Advice and not Personal Advice

Council of Owners Report 17/10/12

This year has been a very busy year for your committee, beside the normal maintenance of the complex your council been working on:

- Complex Security
- Electrical Safety
- Gas Safety
- Pool Area
- Lighting Upgrades

Complex Security:

Discussions have taken place regarding the further tightening of security around the complex. There have been several ideas discussed including security cameras and coded pedestrian gates. As this is still in the early stages of assessment, there is no information available for owners at this time.

Electrical Safety:

Common lighting and power systems have been modified to allow the installation of safety switches as required by state legislation. These safety switches not only dramatically reduce the risk of electrocution, but also dramatically reduce the risk of fire associated with electrical faults.

Gas Safety:

The Strata Company has been working closely with plumbers and Energy Safety to bring the building up standards required. This has been a long and time consuming process with records showing initial discussions around this work started over 10 years ago. At the time of writing this report 20% of the work had been completed with 40% scheduled to be completed by the end of the year

Pool Area:

Urgent work was required on the pool area this year after the City of Vincent mandated several changes as the area was not compliant with safety regulations. This work required the removal of the termite damaged retaining wall and replacement with a new limestone block retaining wall, and the replacement of some sections of fencing. The paving in the pool area still requires replacement and this work is scheduled to occur sometime in November.

Lighting Upgrades:

Over the past two years we have replaced many areas of lighting with newer and more efficient lighting systems. These upgrades have resulted in a reduction in electricity usage by around 40%. For further information see this link <http://themews.info/electricity>
